## Unique as UK find

**1. Two Stars Left.** Bellovaci. c.58/57-50 BC. AV stater. 18mm. 5.18g. Traces of head r./ Horse prancing l, large star above and below. Scheers Series 25, class 1, plate VI, no. 159, DT 265. CCI 00.1346 (**this coin**). VF, large flan of golden gold, clear stars. Ex Geoff Cottam coll, bt. Barnard, 22 April 2000. Found Preston, Kent. **UNIQUE?** as UK find. **£750**

Dr John Sills says: "When Simone Scheers compiled her monumental catalogue of Belgic coins in the 1970s there were only six of her series 25, class 1 staters à l'astre known, the early type with a left-facing horse on the reverse. Today there are many more, but the much commoner class 2 right-facing coins still outnumber them by three to one. This one is the only left-facing stater recorded from Britain

and there is still only one right-facing stater, a coin sold by Seaby's in 1979 from Petworth, Sussex. Scheers tentatively assigned the series to the Velocasses but in a ground-breaking 1987 article Louis-Pol Delestrée reattributed them to the Bellovaci, one of the most important Belgic tribes. They are clearly a Gallic War coinage but despite their apparent strength the Bellovaci surrendered to Caesar fairly early in the campaigns of 57 BC, which may explain why so few of their wartime coins made it across the Channel. In contrast to Gallo-Belgic E, which was struck in large part to pay for help from the British tribes, the distinctive staters of the Bellovaci may have been issued to pay tribute to the Roman army rather than to finance resistance. Caesar tells us that after their defeat the leaders of the tribe fled to Britain (*de bello gallico* 2.14); did one of them bring this coin with him?" (pers.comm. 26.6.25).

The concave-sided 'kite' also occurs on the Norfolk God silver units of the Icenii (ABC 1564, 1567) and on Icenian half units too (ABC 1648, 1684-96). This specimen shows the curved sides very clearly. Not shown in ABC nor Spink.

CCI 16.0313 (**this coin**). *Gd VF, yellowy gold, super spiral. Ex John Robinson coll, ex Turner coll.* **R £650**

Robert Van Arsdell catalogues Savernake Forest gold staters as 'Trinovantian/Catuvellaunian'. In *Ancient British Coins* we catalogue them as 'East Wiltshire' and we feel that their distribution justifies this more westerly attribution.

**21. Dahlia Horse Left.** c.55-45 BC. AV quarter stater. 10mm. 0.86g. Crossed wreaths./ Triple-tailed horse l. ABC 2109, VA 232, BMC 537, S 48. *Near VF, cuprous gold.* **S £275**  
This type was originally classed as Atrebatas but every provenanced example comes from Wiltshire. It clearly served as the prototype for the base gold East Wiltshire Vale of Pewsey quarter stater, ABC 2107.

**DUOTRIGES** Wessex, cap. Durnovaria (Dorchester).

**22. Cranborne Chase.** c.58-40 BC. Base AR stater. 16mm. 3.34g. Wreath motif./ Disjointed horse l, pellets. ABC 2169, VA 1235-1 var., BMC 2653-86, S 367. CCI 07.1159 (**this coin**). *VF/gd VF, bold pellets. Ex J Lambeth coll, bt CR (2007). Fd. Tarrant Monkton, Dorset.* **£150**

Probably minted at Hengistbury Head, Dorset, excavated 1911-12

and 1979-84. Most Hengistbury cast bronze units are locked away in museums, which is why they are rarely seen for sale. Not in ABC, BMC nor Spink.

**24. Badbury Starfish.** DQS Class 2, Die-group 3, dies O3/R4. c.40-20 BC. AR quarter stater. 12mm. 0.86g. Five-arm starfish motif with central pellet and curve of pellets between each arm and ringed-pellet at end./ Horizontal thunderbolt with line of pellets between two eight-rayed lightning flashes. ABC 2220, VA 1270, BMC 2780-81, S 369. CCI 23.2201 (**this coin**), PAS: SUR-7548A6 (**this coin**). *Gd VF, silvery silver, bold starfish, sharp lightning flashes. Fd. Nether Wallop, Hants.* **RR 30 others this pair of dies £350**  
The Badbury Starfish is a dramatic break with tradition. For decades Durotrigan moneyers had depicted 'three men in a boat' on their quarter staters until the dies had become so worn as to be unrecognisable. We might surmise that the ruler who chose a starfish had strong maritime connections, possibly trading with merchants of Armorica (Brittany) through Poole Harbour or Hengistbury Head. The curve of pellets look like suckers between the five arms and capture the nobby warty skin on this Dorset echinoderm (which means 'spiny skin'). Published in *DQS*, p.225 (**this coin**).

**EASTERN** uncertain north Thames types

**25. Lister's Celtic Head.** c.50-40 BC. AR unit. 13-15mm. 1.03g. Male head r, with angular eyebrow and noseline, rounded chin, shaggy moustache curling up at ends, large locks of hair falling down to the back of neck, small horse in front of face./ Well-formed horse prances r, cabled mane, corded tail, winged object and pellet triads above, beaded-ring in front, ringed-pellet below. ABC 2478, VA 1540, BMC-, S-. *VF/Gd VF, well centred, lovely horse, clear wing. Ex G Cottam coll.* **RR only 21 others recorded £950**

Is the shaggy head that of Cassivellaunos, commander of the British coalition against Caesar, 54 BC? Entirely possible, in which case it might be Britain's earliest portrait coin. Named after Major Clement Wynter Lister (1920-2010) who published the first recorded example in 1959 (*BNJ* 29, pp.5-7, pl.XV.6).
